WE PAY CASH

WE HAVE DEVISED A PLAN TO PAY YOU CASH FOR GIVING CREDIT TO HENDRICKS' COMMERCIAL REGISTER, WHEN ASKING QUOTATIONS FROM FIRMS WHOSE NAMES ARE CLASSIFIED THEREIN.

WE BELIEVE THAT HENDRICKS' COMMERCIAL REGISTER IS USED BY MORE BUYERS FOR PURCHASING PURPOSES THAN ANY OTHER PUBLICATION EVER ISSUED.

BUT OUR PROBLEM IS: HOW CAN WE PROVE IT?

WE HAVE DECIDED TO PAY FOR THE EVIDENCE.

WHEN WRITING A FIRM WHO IS LISTED IN HENDRICKS' COMMERCIAL REGISTER, ATTACH THE RED COUPON TO YOUR LETTER, FILL OUT THE WHITE ONE AND MAIL IT TO US, AND WE WILL REMIT FIVE CENTS IN CASH FOR EACH COUPON SO USED.

WHEN YOU ARE OUT OF COUPONS WE WILL FURNISH MORE.

THE GREEN FUEL ECONOMIZER

WHAT IT IS AND WHAT IT DOES

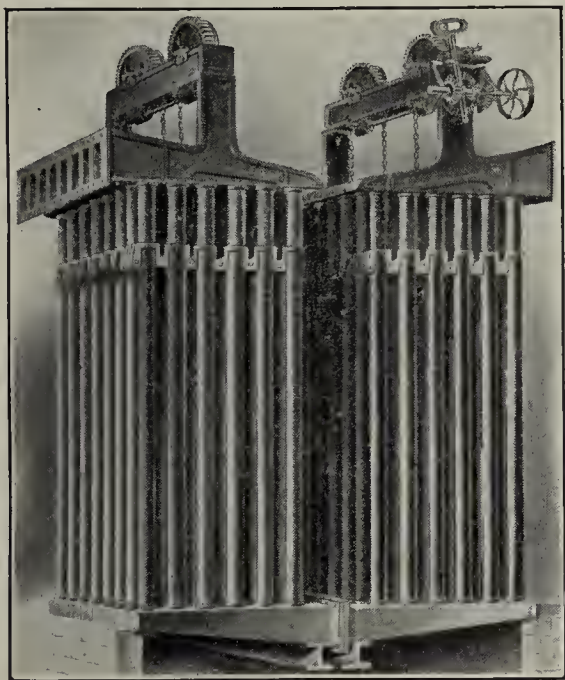

STEAM boilers are ordinarily so proportioned that 5 to 6 lbs. of coal are burned per sq. ft. of heating surface per hour, and under such conditions the temperature of the flue gases is usually higher than 550° F. This is much above the temperature at which the feed water enters the boiler and therefore represents **HEAT THAT MIGHT BE SAVED**, if sufficient heating surface were provided.

Much more boiler tube surface would be expensive; it would be attacked by sulphurous acid condensed from the gases and, without automatic scrapers, would soon be incrustated with soot.

Experience has shown that this additional surface is best provided in a Green Fuel Economizer, the heating surface of which consists of vertical cast-iron tubes not easily corroded, and provided with automatic scrapers for cleaning. Send us full particulars about your power plant and we will show you how an economizer can pay 30 to 50% **INTEREST ON THE INVESTMENT.**

Ask for Our Book "HD" on Power Plant Economy.

GREEN AIR HEATER

lieving the boiler plant of this demand for steam, it increases by the same amount the steam available for other uses. In most cases the device will pay for itself by the saving in fuel inside of a year, and will require no more care and attention than steam coils.

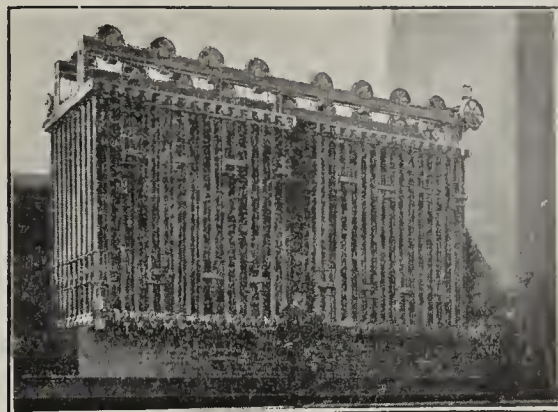

We have just published a pamphlet describing in detail its construction, manner of working, plants in which it has been installed, and results obtained.

THE SUPERIOR GAS SOLDERING FURNACE

Thousands in use. Made for natural, illuminating or producer gas, for one or two irons. Hundreds sold every month on repeat orders. The high temperature developed in the furnace chamber is terrific. Try one, and it will be understood why hundreds of these are sold in cases where the first proves the last sold of other makes.

The A. H. Andrews Co.

Largest Mfrs. of

School Furniture, Opera Chairs, Assembly Seating, Church Furniture

Designers and Manufacturers of High Grade Bank and Office Fixtures and Furniture. Satisfactory work of any kind can be had only of the specialist. Forty years of practical experience in planning the equipments of banks has made the A. H. Andrews Co. the most successful and most highly regarded bank designers in the world. They have designed, planned or equipped over five thousand (5000) banks in America—nearly one-third of all the banks in the United States.

LEAKY FLANGES ARE NO MORE IF YOU USE GOETZE'S ELASTIC CORRUGATED COPPER GASKETS

You want to avoid loss of time through interruptions caused by leaky flanges. You want to prevent waste of material and have clean tube linings. You want to do repairing quickly and surely. There is only one way to accomplish this, viz.: use GOETZE'S ELASTIC COPPER GASKETS. Suppose you write for prices and ask for a testing sample.

Westinghouse

Electric Motors For Industrial Purposes

Westinghouse Types Motor Driving "American" Lathe.

The Advantages

of electric drive for all industrial purposes are no longer disputed; it is cheaper, cleaner, safer, more efficient than other forms of power. To get the best results however it is of great importance

to use only motors that are absolutely reliable, that can be operated by unskilled labor, and that will run day in and out with but an occasional oiling. Westinghouse Motors possess all these qualities; they are successfully driving every kind of apparatus, in every class of work, under every condition of service.

YOU DON'T KNOW

POLISHED WIRE GLASS.

When your property will be swept away by fire and the loss you may have to suffer in consequence.

That you are or are not amply covered by insurance is of little account when you stop to consider that a vast portion of your loss may include that which money can never replace. It is gone forever to the ash heap. You don't want to burn out. Be wise. Install Wire Glass set in metal frames and you will then have adopted the best means of protection and in the long run the most economical.

BETWEEN THE TWO

An architect, a builder or a property owner has his glass problem solved, not for the present only, but for all time to come.

IN WIRE GLASS he finds a product of unequalled Fire Retarding Efficiency that prevents the entrance or egress of draft and flame and the perils attending glass breakage, while in Mississippi Figured Glass he has clearly defined, forceful and decorative patterns of great brilliance and diffusive power, especially suitable for interior glazing of all classes of buildings.

Samples and printed matter on request.

MISSISSIPPI FIGURED GLASS.

MAZE.

**ORNAMENTAL AND HARMONIOUSLY
EFFECTIVE.**

Produced in various patterns possessing much brilliance and expression and free from the objections inherent to chipped, ground or enameled glass.

Especially suitable for interior and exterior glazing of all classes of buildings, steam and electric passenger cars, ferry boats, yachts, and a variety of special uses where a maximum diffusion of light, together with an exclusion of vision, to insure privacy, are demanded.

BETHEL WHITE GRANITE.

THE MOST BEAUTIFUL STONE IN THE WORLD.

We are just completing the granite work for the new Union Terminal Station at Washington, and the National Museum, two of the finest and largest building contracts ever let, for which buildings BETHEL WHITE GRANITE was selected in preference to all granites and marbles.

For monumental and mausoleum work it has no equal, and we will be in the market for this class of work in the Fall of 1907.

E. B. ELLIS GRANITE COMPANY,

NORTON GRINDING WHEELS

ARE MADE OF
ALUNDUM

ALUNDUM

A THREE CORNERED ARGUMENT for NORTON GRINDING WHEELS

The purity and uniformity of ALUNDUM are under absolute control. Grinding Wheels made of this material must naturally be more uniform and even throughout than when made of natural or artificial abrasives which vary in purity and uniformity.

ADAPTED FOR ALL GRINDING PURPOSES.

PURE CORUNDUM

is nature's own production and still stands unequalled although there are numerous imitations. The leading Machine Tool Builders are fast becoming acquainted with this fact, with the result that Pure Corundum Wheels are fast being adapted by this class of people.

Our Pure Corundum Wheels are also being recommended to their customers by importers and manufacturers of high grade steel for no other reason than that the wheels are so free and cool cutting.

Have you given them a trial ?

THE GORTON SYSTEM OF HEATING

is the ideal system. It embodies all the advantages of the Vapor, the Vacuum and Hot Water Systems with none of their disadvantages or defects.

The Gorton System costs less to install complete than the ordinary Hot Water System, and it can be put in by any Steam Fitter.

We will be pleased to send catalog and give further information on application.

GORTON & LIDGERWOOD CO.
96 LIBERTY STREET, NEW YORK, N. Y.

THE GORTON SIDE FEED BOILER

is specially constructed so that it will maintain a steady heat for ten hours without attention.

This is a very important advantage to be considered, as it insures a warm building day and night in coldest weather.

Acme Chain Hoists and Overhead Trolleys

AN Acme Chain Block and Trolley Combined is the greatest known labor-saving device. Better than others because of requiring less power to raise the full load, which is always safely sustained. The large diameter of trolley wheels permits the load to be moved with the least friction. The unloaded hook of the chain block may be raised or lowered instantly, thus saving time as against others.

We send them on 30 days' trial to responsible firms.

Flexible Steel Armored Steam and Air Hose.

THE LATEST ADVANCE IN THE ART.

It consists of a high grade rubber hose, covered with a substantial yet flexible steel armor. The steel armor protects the hose from mechanical injury and encases it so tightly that it prevents expansion, thus prolonging the life of the hose, and if a break in the rubber hose occurs the rupture is bound by the armor so that only a small part of the steam or air pressure is lost. A rupture in the ordinary protected steam or air hose results in a complete loss of pressure. Write for further information to

WE PAY CASH

WE HAVE DEVISED A PLAN TO PAY YOU CASH FOR GIVING CREDIT TO HENDRICKS' COMMERCIAL REGISTER, WHEN ASKING QUOTATIONS FROM FIRMS WHOSE NAMES ARE CLASSIFIED THEREIN.

WE BELIEVE THAT HENDRICKS' COMMERCIAL REGISTER IS USED BY MORE BUYERS FOR PURCHASING PURPOSES THAN ANY OTHER PUBLICATION EVER ISSUED.

BUT OUR PROBLEM IS: HOW CAN WE PROVE IT?

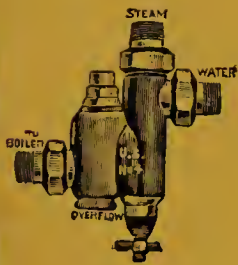

WE HAVE DECIDED TO PAY FOR THE EVIDENCE.

WHEN WRITING A FIRM WHO IS LISTED IN HENDRICKS' COMMERCIAL REGISTER, ATTACH THE RED COUPON TO YOUR LETTER, FILL OUT THE WHITE ONE AND MAIL IT TO US, AND WE WILL REMIT FIVE CENTS IN CASH FOR EACH COUPON SO USED.

WHEN YOU ARE OUT OF COUPONS WE WILL FURNISH MORE.

A ROOFING MATERIAL

to give long service and complete satisfaction, must be capable of rapid expansion and contraction. Without these two qualities it will soon be rendered practically worthless because of breaks and buckling. In the making of

ROOFING TIN

we carefully figure both these factors, and the result is a Terne Plate that offers the greatest protection. These qualities, in conjunction with its well known pliability and perfect coating, have made MF Ternes the plates they are and the ones you need if you want the best to be had. Send for our booklet "From Underfoot to Overhead" if you would like to know how real Roofing Tin is made. It is free.

KUHNE'S TRUSS METAL LATH

(PATENTED)

AWARDED
SILVER MEDAL
AT THE
WORLD'S FAIR
SAINT LOUIS, 1904.

TESTED AND
APPROVED
BY THE
NEW YORK
BUILDING DEPT.

(HALF SIZE)

Shipped in Crates containing 350 Square Feet.

STOCK SIZE, 28 X 90 INCHES.

No. 26 gauge has a cross section of 0.216 square inch per foot in width, and weighs 0.80 pounds per square foot.
No. 28 gauge has a cross section of 0.18 square inch per foot in width, and weighs 0.67 pounds per square foot.

Plaster partitions erected with Truss Metal Lath will never crack, even in the severest fire test, because they have no iron uprights. Ask Professor Ira H. Woolson of the Columbia University, New York. No. 28 gauge is the material for partitions.

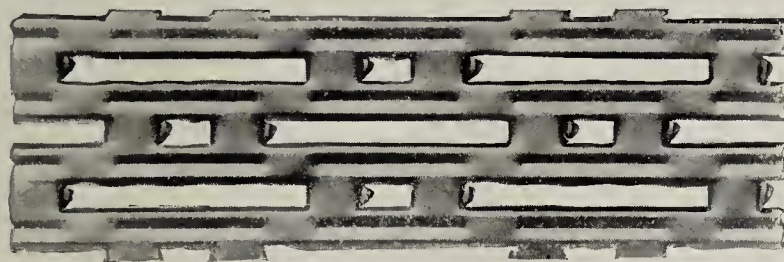

Compare the cross-section of our No. 28 gauge with No. 10, 3-inch mesh Expanded Metal, and you will find what our material can do in this form. It is useful for any kind of reinforcement and in many cases without the wooden centering.

KUHNE'S CLINCHER LATH

(PATENTED)

BIG SAVING OF MORTAR
ON ACCOUNT OF ITS
MANY CLINCHES.

A THIN COAT OF MORTAR
IS VERY IMPORTANT
FOR CEILINGS.

IMPERIAL EXPANDED METAL CO.

707-265 La Salle Street - CHICAGO, ILL.

Spiral Expanded Metal Lath.

Steel Studding for Hollow and Solid Partitions. Metal Lath can be erected on these studs in one-half the time than on any other. Metal Furring, Corner Bead and Large Mesh for Concrete Reinforcement.

THE SPIRAL TWIST MAKES THE BEST BOND AS THE CLINCH IS PERFECT.

You will find a large saving in plaster and labor, as there is no waste.

ESTIMATES FURNISHED for the erection, complete ready for plastering, of Metal Lath and necessary iron work.

SEND FOR PRICES AND SAMPLES.

IF YOU ARE INTERESTED IN FIREPROOF CONSTRUCTION, SEND FOR OUR HANDBOOK ENTITLED "CLINTON WIRE LATH"

This book was prepared under the direction of recognized authorities on lathing and plastering, and represents the results of the best and most up-to-date practice. The comprehensive and practical manner in which the different subjects are treated makes this a handbook which should find a place in the library of every one interested in fireproof construction.

"Clinton Wire Lath" is handsomely and substantially bound in boards and is illustrated with drawings and photographs of types of construction and applications.

It will be sent free upon application to any of our offices.

In writing for a copy of *"Clinton Wire Lath"* also ask for the new catalog of the *Clinton Fireproofing System—the System with the Continuous Bond*.

A building in which the plaster rests on a foundation of *Clinton Wire Lath* and whose floors, roof, ceilings and partitions are constructed according to the *Clinton Fireproofing System—the System with the Continuous Bond*—is fireproof in its most vital essentials.

Gisholt Turret Lathes

On work requiring Boring, Turning and Facing also Threading if desired, one Gisholt will do as much work as from two to four engine lathes and with an average for accuracy that is greater than the engine lathe. We have had some twenty years of experience in equipping lathes of this class and have made thousands of different tool outfits. If you are interested in reducing time on this class of work, write us, or better, send us blue prints and we will advise you regarding the adaptability of Gisholt Lathes to your work. Six Sizes. Complete Catalogs Issued.

Over 40% of Fire Losses are Caused by Lightning.

ABSOLUTELY PREVENTED BY NATIONAL PURE COPPER CABLE LIGHTNING RODS.

There has been a revolution in the matter of lightning rods in the past ten years. The National Lightning Rod, which is scientifically constructed and applied, absolutely prevents all loss by lightning.

The following specifications have been approved and accepted by the U. S. Government for powder magazines and government monuments :

30-wire, soft copper cable, the copper 98% pure.

Pure copper points on all gables and projections, and at intervals of 20 feet along horizontal ridge-poles.

Pure copper couplings.

Cable attached to building by metal fasteners (no insulation permitted).

At least two connections with the ground.

Ground connections to run to permanent moisture, from eight to fourteen feet below the surface.

No loss by lightning has ever been known on a building carefully rodded by a static electric expert, according to these specifications. It has been proved by insurance records running over many years that much over 40% of the fire losses are due to lightning—a loss that would be absolutely saved by National Pure Copper Cable Rods.

National Pure Copper Cable Lightning Rods

Are constructed in exact accordance with government specifications, and are put in place by our own experts.

Where others use hard-drawn wires, or copper coated iron, we use soft copper 98% pure—the finest made—and stand ready to refer all inquiries to the nationally famous concern that supplies the copper we use.

Where others use brass couplings, we use only pure copper.

Where others run their rods only a few feet into the ground, our experts see that all rods run to permanent moisture, even if it is fourteen feet under the surface.

National Board of Underwriters Approves National Copper Cable Lightning Rods.

H. DAVIS IVES, Architect.

160 Fifth Avenue, New York City, April 1, 1907.

National Cable & Manufacturing Co., Niles, Michigan.

Gentlemen: Will you kindly send me the address of your New York representative, as I wish to see him in regard to lightning rods.

The National Board of Underwriters referred me to you.

Yours truly,

H. DAVIS IVES.

KEY LOCKS A DELUSION

Nine times out of ten it does not require anything which resembles a key to unlock the lock. It is a very convenient and popular idea with everybody to get along without keys for their Watch and Safe. It is very much more convenient to get along without keys for House, Office, Barn, Store, Tool Chest or Locker.

Why be longer annoyed, chasing after, or fumbling pockets for keys, or door for key-hole. When in need of locks for any purpose get a Miller Keyless, use it for a time and you will forever discard key locks.

Let us quote you prices. You can have a stem-wind house as well as watch, for less than the cost of key locks.

DO YOU USE OIL or GREASE CUPS?

If you do you should write for this little booklet, as it illustrates and describes our entire line of lubricating specialties.

The workmanship and material are the best, and they are made by experts who have had experience in this line, covering a period of more than a score of years.

Consult us on lubrication matters—one of Williams Lubricating Devices may save you a lot of trouble and expense, also enable you to forget many ever present engine room ills.

A postal will bring this booklet by return mail. Want a copy?
